Ari's Fantasy Team: LamARI SHAPson

4-0, 1st of 10 in the Quarton 5th Grade DAWGS.

Week 5 vs The Jude Crew: 206.6–89.8, leading going into Monday night.

Sunrise on Mars: Curiosity Snaps a Dawn Over Wind-Carved Cliffs

A robot explorer's camera caught early light on strange, sculpted Martian rock

Imagine waking up on another planet and snapping a sunrise picture. That is what NASA's Curiosity rover did. Its Mastcam camera took six photos at 8:30 in the morning, Mars time, on August 11. Scientists stitched them into one wide view.

The cliffs in the picture are called yardangs. Wind carved them over a very long time, and they stretch about 10 miles along a mountain named Mount Sharp. Curiosity has climbed it since 2014.

Even the scientists are puzzled. Project scientist Ashwin Vasavada says the cliff layer "looks out of place." The rover should reach the cliffs in 2027 to find out why.

NASA/JPL-Caltech, "NASA's Curiosity Rover Catches Stunning Martian Dawn," Oct. 6, 2026.

A Glow-in-the-Dark Paint Helps Test Airplane Wings

At NASA's Langley center in Virginia, engineers painted a model airplane wing with a special paint that glows under ultraviolet light. How bright it glows changes with the air pressure pushing on it. Cameras filmed the glow in a wind tunnel, showing where air pushes hardest.

NASA, Oct. 2, 2026

WORD OF THE DAY

luminous
adjective

giving off light; glowing
"The luminous paint glowed bright under the purple lamp."

Daily Joke

Why did the pancake go to the doctor? It was feeling a little flat! *(Ba-dum-chh!)*

Fun Fact

A day on Mars, called a sol, lasts 24 hours and 39 minutes.
NASA
